

# “Benefits from Sustainability?!”

## bonnalliance<sup>ICB</sup> lecture series

in cooperation with the International Centre for Sustainable Development (IZNE) of the Hochschule Bonn-Rhein-Sieg, University of Applied Sciences (H-BRS)

## Invitation to the bonnalliance<sup>ICB</sup> lecture series **Benefits from Sustainability?!**

In our second bonnalliance<sup>ICB</sup> lecture series “Benefits from Sustainability?!” we are looking at five scenarios that showcase the positive effects of a transformation towards sustainability. This lecture series takes place in cooperation with our alliance partner International Centre for Sustainable Development (IZNE) of Hochschule Bonn-Rhein-Sieg, University of Applied Sciences (H-BRS).

Sustainability is a topic often approached from the starting point of a “dooms day” scenario: our natural resources decrease, the climate on our planet is changing for the worse, and the future does not look too bright anymore. However, an increase of knowledge to address complex problems, innovative solutions and improvement of action might also come along with benefits or an added value.

What are the potential “benefits from sustainability” that we might encounter on global and local levels?

**Where?**

University of Bonn, Main Building, Lecture Hall II

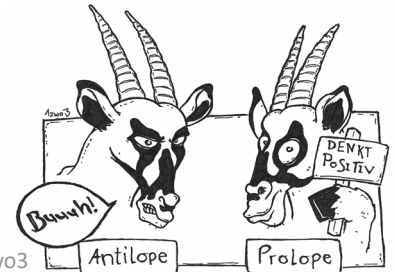

**When?**

October 10, 17 & November 7, 14, 21

6-8pm (s.t.)

Organized by

the Head Office of the Bonn Alliance for Sustainability Research/ Innovation Campus Bonn (ICB) and the International Centre for Sustainable Development (IZNE)

**bonnalliance<sup>ICB</sup>**

Sustainability research should take place in a direct exchange and dialogue with politics, society and economy from the local to the global level.

This is the guiding principle connecting the six partner institutions of the Bonn Alliance for Sustainability Research.
